

ARYAN AGARWAL

Senior Software Engineer | Technical Lead | Backend & Full-Stack

📞 8171256946 @ aryankush025@gmail.com 📍 Bangalore, India

SUMMARY

Senior Software Engineer and Technical Lead with nearly 8 years building backend and full-stack systems in Node.js and TypeScript, with experience leading teams from small squads to 20+ engineers. Comfortable owning a system end to end, from API design and data modelling through infrastructure as code, CI/CD and production. Currently leading a team at Thoughtworks on a logistics platform for Apple. Previously Technical Lead at Glue Labs, taking four products from zero to production. Also built and operate Dashgen, a multi-provider LLM platform, solo.

EXPERIENCE

Senior Software Engineer

Thoughtworks

📅 02/2025 - Present 📍 Bangalore, India

Embedded with Apple's engineering team, building and evolving its shipping exception management platform.

- Lead a team of 6 engineers delivering a shipping exception management platform, owning delivery across React frontends and Node.js services.
- Built the MVP and proofs of concept, then owned delivery across multiple phases through production launch; the work received formal commendation from Apple product leadership.
- Designed a questionnaire-driven workflow engine that replaced manual exception triage.
- Replaced HTTP polling with WebSockets, eliminating approximately 1MB of redundant traffic every 3 seconds.
- Primary technical contact for client stakeholders across product, backend, and QA; run architecture reviews and set the team's TypeScript, testing, and state-management standards.

Technical Lead

Glue Labs

📅 10/2021 - 01/2025 📍 New Delhi, India

Led product engineering end to end across Glue Labs' web, mobile and identity products, from idea through design, build, QA and release.

- Led a cross-functional team of developers, QA, and DevOps, growing engineering from 8 to 20+ through hiring; trained and mentored 10+ interns across React, React Native, and Flutter.
- Owned engineering across FIFO, Glue, Glue Mobile, Glue Identity, and xG, taking products from idea to production and shaping features with the designer, CEO, and customers.
- Ran scrum as scrum master: sprint planning, stand-ups, and code reviews; resolved disagreements across development, design, QA, and product.
- Owned the release flow from dev through QA and UAT to production, including the branching strategy, and worked with the DevOps engineer on deployment pipelines.

Software Development Engineer

GeekyAnts

📅 02/2019 - 10/2021 📍 Bengaluru, India

Full-stack engineer delivering web and mobile products for clients, while contributing to hiring and mentoring.

- Delivered client products across web and mobile, including Sortly, Airops, Torii Homes, Acroboby, and Hotcoldbags.
- Conducted 40+ technical interviews, contributing to 10 successful hires.
- Trained and mentored 4 junior developers, and code-reviewed and mentored the team building FWD's authentication service.
- Spoke at the React Native & Flutter Bangalore meetup (Nov 2020) on building real-time voice chat in React Native with Agora, and gave a tech talk on Apollo Client for GraphQL APIs.

SKILLS

Languages

TypeScript, JavaScript, Python, Go

Backend

Node.js, NestJS, Express.js, Fastify, FastAPI, GraphQL, REST APIs, WebSockets, PostgreSQL, MongoDB, TimescaleDB, Redis, Kafka, Deepstream, Socket.IO, Sequelize, TypeORM, OAuth 2.0, OpenID Connect, Ory Kratos, Ory Hydra, Microservices, Distributed Systems

Tools & DevOps

AWS (EC2, RDS, S3, SES), Docker, Kubernetes, Terraform, GitHub Actions, Buildkite, Caddy, Nginx, Firebase, Supabase, LangChain

Frontend

React, Next.js, React Native, Flutter, TailwindCSS, Redux, Redux Saga, React Query, Zustand, Material UI, Styled Components

KEY ACHIEVEMENTS

Team scaling

Grew engineering at Glue Labs from 8 to 20+ engineers.

Client commendation

Formal recognition from Apple product leadership for project delivery.

Shipped a product solo

Built and operate Dashgen end to end: architecture, infrastructure, deploys and support. 100+ active users.

Led 4 products to production

Took FIFO, Glue, Glue Identity and Glue Mobile from concept to production.

Technical hiring

Conducted 40+ technical interviews, contributing to 10 successful hires.

PROJECTS

Dashgen

📅 09/2024 - Present

🔗 <https://dashgen.in/>

Founder · personal project, 100+ active users

- A platform designed to interact with various **LLMs** (e.g., **OpenAI**, **Anthropic**, **Mistral**, **Groq**, **Google Gen AI**, **xAI**, **DeepSeek**) through API keys in a single, unified interface.
- **Infrastructure as code with Terraform** across three environments (production, staging, QA), each with separate state; deployed to AWS via GitHub Actions.
- **Technologies:** NestJS, PostgreSQL (RDS), LangChain, Docker, Caddy, Terraform, GitHub Actions, AWS EC2, SES, S3, Next.js, TailwindCSS, Zustand.

FIFO

📅 10/2021 - 01/2025

Technical Lead · Glue Labs

- Started as a real-time voice app in **React Native and Firebase**, leading a team of 4 (first lead role); migrated it to the web on **React, Node.js, GraphQL and PostgreSQL**.
- Replaced unstable **Apollo subscriptions with Deepstream pub/sub** to scale real-time rooms; built rooms on the frontend and guided the backend team.
- Led the pivot to a content publishing platform for D2C businesses: a threaded post format and custom domain mapping for user profiles.
- Built an events service in **NestJS with Kafka** as the queue and **TimescaleDB** as the store, feeding analytics and notifications.
- **Technologies:** React, Next.js, React Native, Firebase, Node.js, NestJS, GraphQL, PostgreSQL, Redis, Deepstream, Kafka, TimescaleDB.

Glue

📅 10/2021 - 01/2025

Technical Lead · Glue Labs

- App for creating fan pages with AI-generated videos and rewards to engage customers.
- **Technologies:** Next.js, NestJS, PostgreSQL, Redis, TailwindCSS, React Query.

Glue Identity

📅 01/2022 - 01/2025

Technical Lead · Glue Labs

- Identity management platform and **OAuth 2.0 provider** for the Glue Labs portfolio: authentication and RBAC across products.
- Led a team of 4; found the in-house implementation didn't follow OAuth 2.0 conventions and moved it onto **Ory Kratos (identity) and Ory Hydra (OAuth 2.0 and OpenID Connect)**.
- **Technologies:** NestJS, PostgreSQL, Redis, Ory Kratos, Ory Hydra, Next.js, TailwindCSS, React Query.

Airops

📅 02/2020 - 05/2021

Software Development Engineer · GeekyAnts

- Admin dashboard for flight pilots across web and mobile, with expense tracking and PDF report generation.
- **Technologies:** React, Flutter, Redux, Material UI, PDF Builder.

Torii Homes

📅 05/2021 - 10/2021

Software Development Engineer · GeekyAnts

- Real estate and personalised home-purchasing platform; built full-stack across web and mobile with shared state management.
- **Technologies:** Node.js, Express.js, Knex.js, Next.js, React Native, Material UI, NativeBase, Redux.
